MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategy

Investment objective

The Company's objective is to generate income while preserving, for its beneficial shareholders, capital for re-investment. As a mortgage investment corporation, the Company expects to derive its earnings principally from the receipt of mortgage interest payments, mortgage fees, and of interest or interest like distributions on the cash reserves of the Company.

Investment Strategy

The Company will achieve its investment objective by lending on the security of mortgages on real properties in urban western Canada, primarily situated in the province of Saskatchewan. The mortgages transacted by the Company will not generally meet the underwriting criteria of conventional lenders. The Company, however, does not trade in mortgages in the secondary market. The mortgage term is not to exceed two years, but providing the mortgage is in good standing and mutual agreement is reached, the mortgage may be renewed for one or more additional terms. As a result, the Company's investments are expected to earn a higher rate of interest than what is generally obtainable through conventional mortgage lending activities. The Company is required to have at all times approximately 10% of its total assets in cash or near

cash securities in order to meet redemption requests and thereby provide an element of liquidity to the investor.

Risks

As of the date of this Management Report of Fund Performance, management is not aware of any negative risk factor which has adversely affected the return on investments for 2010. Management must continually identify and evaluate mortgage applications that meet its eligibility criteria. All bad or questionable loans have been accounted for in the financial statement and no trends are known at this time that will likely either affect the capital base of the Company, the ability of the Company to find and fund mortgage loans or decrease the Company's investment income.

The business operations of the Company are subject to the following risks, amongst others, that could affect shareholder's equity and the Company's ability to generate returns: relative illiquid nature of mortgage investments, ability of borrowers to make mortgage payments, inability of the Company to find suitable mortgage investments, changes in land value, ranking of mortgages, no guarantees to investors on returns or lack of losses, and reliance on third parties. These risks are described in greater detail in the Company's prospectus, a copy of which may be obtained through SEDAR at www.sedar.com, or by visiting our website at www.PrimeWest.ca.

Who Should Invest in this Company?

An investment in PrimeWest Mortgage Investment Corporation may be suitable for medium to long-term investors who:

1. are looking for an investment that generates quarterly returns;
2. are willing to accept a low to medium level of risk;
3. are seeking an RRSP, RESP, and RRIF eligible investment; and
4. do not need the ability to redeem all or any portion of their shares more than once per year.

In 2010 the Company increased its capital through private placements and issuances from an offering memorandum dated December 1, 2009.

Results of Operations

The financial statements of PrimeWest Mortgage Investment Corporation are prepared in accordance with Canadian generally accepted accounting principles (GAAP) and National Instrument 81-106 Investment Funds Continuous Disclosure and all amounts are expressed in Canadian dollars.

Operating Results for the Period

The following table presents the results from operations for the year ended December 31:

	2010	2009
Total revenue	\$ 3,302,826	\$ 2,260,640
Per weighted average common share	\$ 1.69	\$ 1.87
Net earnings	\$ 1,578,799	\$ 996,791
Per weighted average common share	\$ 0.81	\$ 0.82

The revenues of the Company represent mortgage fees and interest from investments, substantially all of which is earned on its investment in mortgages. Increases in revenues were a reflection of two factors: (1) an increased percentage of net assets invested in mortgages and (2) an increase in the weighted average interest rate earned on new mortgages during the year.

Basic net earnings per share is computed by dividing net earnings for the year by the weighted average number of units outstanding during the year.

Diluted net earnings per share are computed similarly to basic net earnings per unit, except that the weighted average number of shares outstanding is increased to include additional shares from the assumed conversion of the convertible debentures and net earnings is adjusted to remove any interest paid to the holders of the convertible debentures, if dilutive. The number of additional shares is calculated by assuming the outstanding convertible debentures were exercised at the earlier of issue date and the beginning of the fiscal period. Because there are no dilutive instruments outstanding, basic and fully diluted earnings per share are the same.
